Introducing Fancy Components: a collection full of fancy, fun, edgy and useless React components!

— Built with react, ts, @tailwindcss and @motiondotdev

— Each comp. includes examples and docs to help you understand how it works and is built

— 100% free & open-source!

fancycomponents.dev

i built this side-project to explore and recreate some of the more unique, funky, unconventional, and sometimes useless ui designs & microinteractions you might see around the web .

would be happy to receive some feedback!
